

Safeguarding passengers and staff every step of the way.

Improving security through people control in multi-access environments.

Airport Security
from the very best

Our airports are the safest around. To keep them that way security measures need constantly updating...

Meesons, the UK's leading security solutions provider are the experts in 'people control' to create the safe environment both staff and passengers demand.

From land to air side Meesons, working with our global partners have created the 'one stop shop' solution to airport security with our range of:-

- Security portals
- SMACS - singularisation control of people and materials
- Turnstiles
- Counters and screens
- Access Controls
- Automatic doors

To safeguard passengers and staff every step of the way.

Security Portals

The first stage in securing sensitive areas is our range of portals developed with our global partner Alluser. Together, we have created the widest range of security portals in the market to eliminate tailgating. Designed, trialled and approved to withstand the toughest of tests.

Superbly designed and manufactured our cost effective security portals can be customised with a range of finishes and fail safe features, and when fitted with Biometric authentication deliver a level of security that is second to none.

SMACS - BioVisual Control

Simply because we are all different, we are all instantly identifiable.

Innovative SMACS technology checks people's physical identity to control access, curtailing the threat of unauthorised people entering a secure area even where multiple entry points must be covered.

Additional Biometric analysis can be provided and integrated with existing access control systems to further enhance security.

Turnstiles

Controlling people access to create a safer environment.

Our turnstiles effectively manage 'people flow' to create a safer environment, delivering improved security into sensitive and restricted areas. A vital part of terminal design.

Meesons' turnstiles cover a range of applications. EasyGate is the premier turnstile solution, simple to use yet created to make a lasting impression, bar and round turnstiles provide cost effective options and the rugged Rexon is manufactured to take on the toughest of outdoor conditions.

All our turnstiles deliver the same benefits:-

- Cost effective, high quality and fit for purpose equipment
- Total project management by our qualified engineers
- Nationwide installation teams to guarantee on time installation.

And the ability to incorporate our total access control system to maximise security in any location.

Counters and Screens

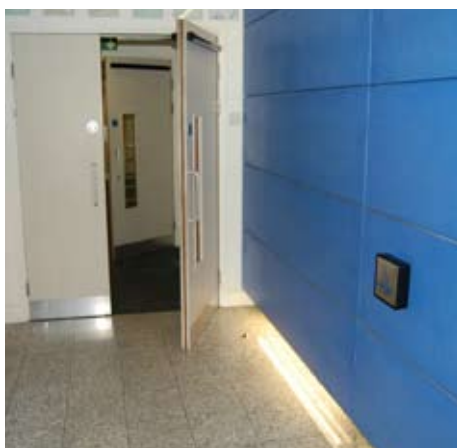

Retractable and Fixed screens – improved security through enhanced staff protection.

'Airport passenger heart rates peak at four times their resting levels and physiological stress levels exceed those of a Formula 1 racing driver' it's understandable why angry passengers put staff security at risk, particularly at check-in and other face to face locations.

Meesons have created the fully automated retractable glazing screen for the crowded airport environment allowing informality but providing the needed security and staff safety at the touch of a button.

To ensure DDA compliance we offer a unique 'one stop shop' solution for airport check-in and reception counters.

We design, manufacture and install counter units to suit both retractable and fixed security screens. We offer a wide range of screen configurations, glass specifications and accessories to suit all applications.

Access For All - Meesons' Automatic Doors

Airports are busy places and 'people flow' needs to be as effortless as possible, but people come in all shapes and sizes and there is their luggage too...

With a host of Government and EU legislation to contend with our range of automatic doors comply with the latest DDA legislation and BS7036:1996 to create the ideal solution for all airport environments

- Cost effective, high quality – fit for purpose equipment
- Total project management by our qualified engineers
- Nationwide installation teams to guarantee on time installation

Meesons Total Access Control system option for maximum security.

Access Controls

Letting people you want in... keeping people you don't out.

Once in people are free to roam – it's difficult to keep tabs on every passenger all of the time, resulting in a dramatically increased threat of tailgating into any secure zone, no matter how well staff are trained.

Meesons are at the forefront in developing and installing tailor made access control systems for a wide range of applications. From simple stand-alone

0870 787 7846

keypads to integrated online control to the very latest Biometric body mass control analysis systems and security portals. We have the right solution to ensure secure zones stay secure, letting the people you want in keeping those you don't out.

Electronic Control Systems

Internal or external keyboards, card swipes and proximity readers, integrated online systems managing 1 to 128 doors, or interlocking systems which control as many doors as required

All electronic control systems can be linked to intruder and fire alarms.

Mechanical Control Systems

Our controllers are easy to re programme and simple and easy to use to provide cost effective access control to those not so sensitive areas.

“Whatever your security requirements Meesons have the right system for your needs. We have been established over 100 years and are at the forefront in delivering enhanced security solutions. We work with many of today’s leading security specialist companies and have a reputation for innovation, product quality and a level of service that sees the company working with an ever widening range of customers including large multi-national corporate organisations and Government bodies”. **Jeremy Terry, Managing Director**
