

Creating a Healthy, Secure Environment.

Improved Security for the Health Sector
from the very best.

**Access Controls
from the very best**

Hospitals, Health Centres and doctors' surgeries all have one thing in common – People.

Consider the variety of people - patients, staff, suppliers, physicians, visitors...

Consider the place - many different rooms and spaces, high-value equipment, accessibility to drugs, many entrances and ease-of-movement around the building and premises.

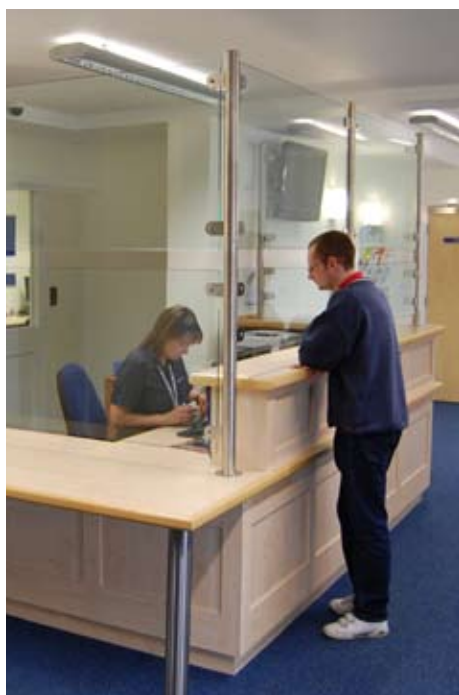

Consider a typical hospital, Health Centre or surgery - an open environment, many managers, internal and external politics, targets, health and safety...

It all adds up to a need for a different approach to security.

Meesons are the UK's leading provider of physical access security solutions. We know the importance of good security, particularly in environments like hospitals and health centres where people movement is difficult to control.

Meesons deliver a 'one stop shop' solution to control people access throughout the building.

We work with you to deliver the right security for your needs, and our skilled technical and installation teams manage the whole process from inception to delivery.

Counters and Screens

Retractable and Fixed Security Screens – Improved security to create a safer environment.

Consider the variety of people...

"NHS staff and other healthcare workers can be as much as four times more likely to experience work-related violence than other workers".

It makes sense to safeguard your staff from the

- Impatience
- Frustration (due to lack of information or boredom)
- Anxiety (lack of choice, lack of space)
- Resentment (having no right to appeal decisions)
- Drink, drugs or inherent aggression/mental instability... of others

Meesons' retractable and fixed security screens are designed to improve staff to patient communication. To create the secure environment required by the HSE directive – 'Employers must assess the risk of verbal and physical violence to their employees and take appropriate steps to deal with it.'

Meesons design, manufacture and install bespoke counter units to suit a wide range of screen configurations and glass specifications across all health sector applications to ensure DDA compliance..

We also carry a wide range of accessories including speech enhancement systems.

To discover how Meesons can help improve security in the health sector simply call us on 0870 787 7846.

Meesons will always be about delivering quality. Quality without compromise.

Access Controls

Letting people you want in... keeping people you don't out.

Consider the place...

Hospitals are always open, you can't stop people coming in. Trying to ensure only authorised people gain entry into sensitive areas can be an impossible task.

Whatever you choose from our range of security portals, simple stand-alone keypads, integrated online control management systems or the very latest in Biovisual body mass control analysis, we have the access solution to ensure secure zones stay secure - **Letting people you want in keeping people you don't out.**

Security Portals

With our global partner Alluser, we have developed the widest range of security portals in the market designed to eliminate tailgating and trialed to withstand the toughest of tests.

Superbly designed, manufactured and cost effective our portals can be customised with a range of finishes and fail safe features and when fitted with Biometric authentication deliver a level of security that is second to none.

SMACS - BioVisual Control

Simply because we are all different, we are all instantly identifiable.

Innovative SMACS technology checks people's physical identity to control access, curtailing the threat of unauthorised people entering a secure area even where multiple entry points must be covered.

Additional Biometric analysis can be provided and integrated with existing access control systems to further enhance security.

Electronic Control Systems

Internal or external keyboards, card swipes and proximity readers, integrated online systems managing 1 to 128 doors, or interlocking systems which control as many doors as required.

All electronic control systems can be linked to intruder and fire alarms.

Mechanical Control Systems

Our controllers are easy to re programme and simple and easy to use to provide cost effective access control to those not so sensitive areas.

Automatic Doors

Access For All – Opening Doors For everyone.

Consider a typical Hospital, Health Centre or Surgery...

A welcoming environment is created through improved people access

Hospitals, health centres and doctors' surgeries are busy places, 'people flow' needs to be controlled but as effortlessly as possible.

Our range of cost effective, high quality fit for purpose automatic doors are ideal for this hard working environment. Doors designed to deliver 'access for all' comply with the latest DDA legislation; and our nationwide installation teams guarantee on time installation.

'Whatever your requirements Meesons have the right access control system for your needs. We have been established over 100 years and are at the forefront in delivering enhanced "people control" solutions. Working with many of today's leading specialist companies we have built up a reputation for innovation, product quality and a level of service that sees the company working with an ever widening range of customers including large multi-national corporate organisations and Government bodies.' **Jeremy Terry. Managing Director**
