

People can be violent at times...

Creating a secure environment in
police stations across the UK.

Security Solutions
from the very best

**Disruptive behaviour is a fact of everyday life... Our police stations are busier than ever...
...and then there are those who require nothing more than to give or receive information.**

Meesons, the UK's leading provider of physical security solutions, understand the importance of delivering improved 'people control' and 'customer/staff communication' for police stations throughout the UK through creating a safer working environment.

Counters and Screens

Retractable and Fixed Security Screens – Improved security to create a safer environment.

Police stations need to be less intimidating yet provide staff security, it's not easy when there are continually aggressive situations which have to be managed.

It was for such situations that Meesons created their range of retractable and fixed security screens to improve 'people communication' yet create a safer working environment.

We design, manufacture and install counter units to suit a wide range of screen configurations and glass specifications to meet DDA legislative requirements for any interior application.

Automatic Doors

Access for All – opening doors for everyone.

By their very nature Police stations need to be secure.

They need to control who comes in and who goes out yet comply with the latest DDA and Health and Safety regulations.

The Meesons' ranges of automatic doors have been created for just such an environment as this.

- We provide cost effective, high quality, fit for purpose equipment.
- Our qualified engineers project manage the entire process from inception to completion.
- We guarantee on time delivery and installation from our nationwide installation teams

Three good reasons why we have become one of the UK's leading providers of automatic and auto assist doors.

Access Controls

Letting people you want in... keeping people you don't out.

Meesons have been delivering secure environments for police stations across the UK.

From simple stand-alone keypads to integrated online control systems to the latest Biometric body mass control analysis programmes we have the solution to ensure secure zones stay secure.

Letting people you want in keeping people you don't out.

SMACS - BioVisual Control Systems

SMACS is probably the most secure anti-tailgating system around today. We are all different and we are all instantly identifiable to SMACS 'All Seeing Eye' which effectively controls entry to remove the threat of unauthorised access into secure areas.

Innovative SMACS technology checks people's physical identity to control access, curtailing the threat of unauthorised people entering a secure area even where multiple entry points must be covered.

Additional Biometric analysis can be provided and integrated with existing access control systems to further enhance security.

Security Portals

With our global partner we have developed the widest range of security portals in the market designed to eliminate tailgating and trialled to withstand the toughest of tests.

Superbly designed, manufactured and cost effective our portals can be customised with a range of finishes and fail safe features and when fitted with Biometric authentication deliver a level of security that is second to none.

Electronic Control Systems

Internal or external keyboards, card swipes and proximity readers, integrated online systems managing 1 to 128 doors, or interlocking systems which control as many doors as required.

All electronic control systems can be linked to intruder and fire alarms.

Mechanical Control Systems

Our controllers are easy to re programme and simple and easy to use to provide cost effective access control to those not so sensitive areas.

'Whatever your requirements Meesons have the right access control system for your needs. We have been established over 100 years and are at the forefront in delivering enhanced "people control" solutions. Working with many of today's leading specialist companies we have built up a reputation for innovation, product quality and a level of service that sees the company working with an ever widening range of customers including large multi-national corporate organisations and Government bodies.' **Jeremy Terry, Managing Director**
