

# Best of Both Worlds

Good communication between you and your customer is a vital part of creating customer loyalty. Employees expect to work in a safe and secure environment and your customers need a face to face conversation to allow you to help them.

Meesons have a range of fixed and automatic screens as well as bespoke counters to suit all situations.

We manufacture and install our entire range and ensure all our products are fully DDA compliant giving you peace of mind that you have not only a quality product but a product that meets your needs entirely.

**MEESONS**  
SAFE SECURE ACCESS

Anti-Tailgating | Counters & Screens | Automatic Doors | Access Control

# Automated Glazing

You need to ensure your colleagues feel safe but at the same time you don't want to isolate your customers. Meesons automated glazed screens could be the answer you are looking for.

A fixed screen can offer your colleagues protection but creates a barrier to your customers. Meesons automated glazed screens give you the freedom to open your reception to allow face to face contact but at the touch of a button, the screen can be closed, fully or partially, for the safety of your colleagues.

All our automated glazed range can be tailored to suit your environment and can be supplied with a bespoke reception counter.

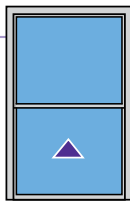

From reception desks to football stadia executive boxes the Meesons automated glazed screen can open your world to an unforgettable experience.
