David Watkins, VIRTUS Data Centres, Service Delivery Director commented,

“At VIRTUS we take great pride in delivering flexible solutions to meet the exacting demands of our customers. The security of our facilities was a key factor in securing the contract initially, and the ability to enhance further to meet all of the customer requirements was very well received. The customer is delighted with the Meesons FPJ140 2SF Fire rated portal, which has operated continuously since installation and complements the overall look and feel of the Data Hall which is a key hub in their worldwide IT operation.”
